

Block

Form. Function. Finesse.

M METAL
FABRIK

Made in UAE
Designed for the World

Metalfabrik transforms creative concepts into aesthetic, functional, and artisanal outcomes that make every project one-of-a-kind.

Our process is grounded in creative exploration, advanced material research, precision prototyping, and rigorous quality control.

We support collaborators from concept to installation—leveraging cutting-edge fabrication technologies and exclusive finishes to bring designs to life with unmatched craftsmanship.

/ 250+ Projects
/ 18+ Years Experience
/ 80+ Team

Metalfabrik

Precision and innovation in metal craft.
Made in UAE, designed for the world.

Metalfabrik collaborates with architects, artists, and contemporary designers to deliver end-to-end design, build, and finish solutions for both bespoke creations and scalable production.

Blok

Cafe and Bar Solutions
by Metalfabrik

Blok delivers fully custom metal café counters and coffee bars, designed around function, workflow, and operational efficiency.

Each unit is engineered to exact specifications, integrating equipment and bespoke metal finishes for long-term durability and performance.

THE PROBLEM

There are multiple challenges with executing a beverage counter today.

Poor communication and coordination between vendors

Result—rework, compromised quality and delayed delivery schedules.

Lack of integration of equipment in the carcass design

Messy on-site cutouts affect durability and compromised aesthetics and hygiene of the counter.

Unplanned MEP points according to the equipment menu

Mismanaged subpar beverage island.

Insufficient engineering and manufacturing expertise

Poor build quality impact day-to-day operations and overall aesthetics.

Lack of industry knowledge and standards

Unexplored solutions result in inefficient and limited design.

The use of unsuitable materials

Reduced counter durability, increased operational issues, and complicated cleaning and maintenance.

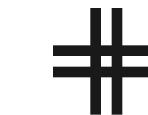

THE SOLUTION

Metalfabrik has reimagined the beverage counter as an end-to-end solution.

From the drawing board to the site—better designed, better engineered, better made.

Complete accountability

Metalfabrik takes end-to-end responsibility of build, delivery and installation—executing at unparalleled speed.

Tested. Perfected. Delivered.

Smooth coordination, advanced engineering, full scale mockups, flat pack modular construction and precise manufacturing, you bring only your equipment list and design intent.

Pre-engineered integration of equipment in the carcass design

Everything from cutouts to electrical points, from plumbing to ventilation is accounted for.

Plug and play design

Contractors only have to connect to the stub-outs provided, no wiring or main connections needed.

Deep industry experience, our expertise goes beyond the build

Deep industry knowledge coupled with unparalleled fabrication capabilities ensures the highest quality standards and smooth operations.

Built to endure

Stainless steel carcass with countertops in stainless steel or stone designed to perform under demanding wet or dry conditions.

RAISING THE BAR

Meet Blok. Built Better.

Electrical, MEP & Systems Integration

- Concealed Electrical Distribution Panel
- Fully Integrated MEP Routing Across the Entire Café Bar
- Integrated Point-of-Sale (POS) & Cash Handling Station

Beverage & Food Service Equipment Integration

- Commercial Coffee Machine & Precision Grinder Integration
- Under-Counter Refrigeration Unit
- Integrated Ice Maker
- Pastry Display Counter with Built-In Compressor Cabinet

Water & Plumbing Provisions

- Integrated Stainless-Steel Sink with Plumbing Connections

Structure, Materials & Finishes

- Monolithic All-Metal Construction (Zero Wood Components)
- Custom Metal Cladding with Bespoke Finish

Work Surface & Hygiene Technology

- Engineered Countertop Surface with Optional Anti-Bacterial Nano-Coat

PRECISION ENGINEERED

Small details. Big impact.
Every Metalfabrik counter
is meticulously crafted for
aesthetics and functionality.

HANDCRAFTED ARTISTRY

Material Expression.
Metalfabrik offers an expansive palette of finishes — from patina hues in brass, bronze, copper, zinc, and carbon, to liquid-metal coatings.

Engineered to merge aesthetic richness with structural resilience.

OUR STREAMLINED PROCESS

A step-by-step guide to executing the perfect beverage counter.

✍ PHASE 1

Design, Planning and Engineering

We collaborate with designers to gather requirements, consult on equipment menus, develop CAD models, and manage shop drawing approvals.

🏭 PHASE 2

Prototyping, Fabrication & Mockup

All prototypes and fabrications are executed at the Metalfabrik HQ, followed by pre-delivery mockup approvals.

🏗 PHASE 3

Delivery & Installation

We ensure flatpack shipment, on-site installation, and seamless project handover.

Why work with Metalfabrik

”

Designers are often hesitant to design bars because of technical complexities. Metalfabrik's approach makes the process simple: Designers provide the aesthetic intent MF coordinates equipment, integration, and finishes. This ensures designers/clients feel secure that one party is responsible for complete delivery.

Achraf Mzily
Founder, Bone Design Studio

”

I cannot speak highly enough about the exceptional service and quality provided by Metalfabrik. Their team demonstrated a level of professionalism and expertise that set them apart.

Agata Kurzela
Interior Designer

”

My experience with Metalfabrik has always been so informative and enjoyable. Interacting with the entire team behind the brand in every meeting, brainstorming together, they always showed me how far we can push and challenge the material to create the most beautiful creations. A fully rounded experience with Metalfabrik that I'm proud to have known the team behind it.

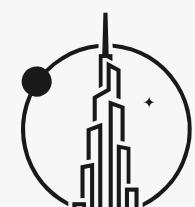

Meshary Alnassar
